

Low Ceiling Mounting (Spring Unit)

Use these modifications if your ceiling height falls below the height to stand the murphy bed cabinet up in the room

Follow the steps for the <https://wwbeds.com/wp-content/uploads/2026/01/Spring-Inset-Lights-Assembly.pdf> with the following changes.

Steps 3-1 to 3-6 | Instead of the verticals on the floor, assemble this standing up and a few feet from the back wall.

Steps 3-7 to 3-8 | With the unit still standing up, attach the header. You'll need a helper to help hold the header on one side (two helpers will be even better). Instead of the screws being put in from the top side, there will be a cleat on the inside to attach the header.

NOTE: In some cases the header may be different and only a 3/4" thick edge showing.

Steps 4-1 to 4-2 | Attach it to the wall from below (the inside).

Everything else should be the same.
